- Incident Response
- Red Teaming & Attack Simulation
- Cloud security Assessment
- Vulnerability Manged Services
- Penetration Testing
- Social Engineering
- LLM & AI Application Testing
- Managed Security Services

Products

PTaaS Platform

CTEM Platform

SECURITY TESTING SERVICES

Testing Approaches

- **Black Box** – No prior knowledge; simulates an external attacker.
- **White Box** – Full access; simulates an internal threat with insider knowledge.
- **Grey Box** – Partial knowledge; balances realism with depth.

Security Testing Services

We deliver trusted results through testing aligned with leading standards, including OWASP, NIST, and PTES.

Focus Areas

- **Penetration Testing:** we provide services for **networks** (external, internal, wireless), **applications** (web, mobile, API), **cloud** environments, and emerging technologies like LLM and AI.
- **Red Teaming:** We deliver simulated real-world attacks using the MITRE ATT&CK® framework to uncover vulnerabilities, and work collaboratively through Purple Teaming to enhance detection, response, and resilience.
- **Vulnerability Managed Services:** We provide Vulnerability Managed Services, including vulnerability scanning and assessment, to identify and manage risks through continuous host and network reviews.

EMERGENCY INCIDENT RESPONSE

Suspect a Breach? Act Now

- Our 24/7 certified team responds fast to contain, eradicate, and recover from security incidents—minimizing damage and helping you bounce back stronger.

We Handle all Major Incidents

- **Ransomware Attacks** – Containment, negotiation, and recovery
- **Business Email Compromise** – Investigation and securing communications
- **Data Breaches** – Scope analysis, forensics, and compliance support
- **Cloud Incidents** – AWS, Azure, GCP threats and misconfigurations
- **Insider Threats** – Evidence preservation and risk mitigation
- **Network Intrusion** – Detection and removal of persistent threats

Why Choose Us?

- **Rapid, Expert-Led Response** – Certified responders with real-world breach experience
- **Clear Communication** – Regular updates, no jargon
- **Proven Methodology** – Containment, eradication, recovery, and review

MANAGED SECURITY SERVICES (MSS)

We'll Handle Threats

You Focus on Business

- Around-the-clock protection by certified UK experts, without the cost of an in-house team. We monitor, detect, and respond, so you can stay focused on what matters.

Our MSS Offerings

- Managed Firewall – Secure, optimize, and monitor network traffic
- Managed SIEM – Real-time event analysis and threat detection
- Managed EDR/MDR – Endpoint protection, threat response & root cause analysis

Our Process

- Onboarding – Understand your environment
- Deployment – Integrate & configure tools
- 24/7 Monitoring – Detect threats in real-time
- Rapid Response – Act fast & keep you informed

Why Choose Our MSS?

- 24/7/365 Threat Monitoring
- Proactive Threat Hunting
- Certified UK-Based Analysts
- Reduced IT Workload
- Enterprise-Grade Security, Cost-Effectively

WHY CHOOSE HACKYDE?
